

**The Optomap® (digital image of the retina)
will be done annually for every patient
UNLESS a waiver is signed.**

Our doctors recommend all patients of all ages to have a digital image of the retina done annually, with the advanced scanning digital imaging system. This image becomes a permanent part of your medical record.

Eye conditions such as macular degeneration, glaucoma, and retinal disease now can be seen without dilation for most patients.

Early detection is crucial!

The fee for this is only \$32 (It is usually not covered by insurance)

_____ I have been informed of the optomap and the additional cost and choose to have the image taken today and understand that I may still need to be dilated if necessary.

_____ I have been informed of the optomap and I choose to decline having this image taken. I do understand that I may be dilated today which may cause me to have blurred vision and light sensitivity for 3-4 hours.
